If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 14 May 2010 has been entered.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ralph Crispino on 17 November 2010.

The application has been amended as follows:

- Line 2 of Claim 3 has been amended from:
"compounds present in the hydrocarbon stream carbon"

---to read as follows---

“compounds present in the hydrocarbon stream include carbon”

- Lines 6-7 of claim 19 have been amended from:
“extractive agent and the one or more organosulfur compounds to form as reaction products water soluble chlorosulfonium ions, said ionic reaction products forming in the aqueous solution,”

---to read as follows---

“extractive agent and the one or more organosulfur compounds to form as ionic reaction products water soluble chlorosulfonium ions in an aqueous solution,”

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or suggest a process for the removal of organosulfur compounds from a hydrocarbon stream comprising contacting a liquid hydrocarbon stream with an *aqueous reactive extractive agent selected from hypochlorites and/or cyanuric acids/ salts of cyanuric acid* as presently claimed. Specifically, there is no teaching or suggestion in the prior art to use an aqueous hypochlorite and/or cyanuric acid as a reactive extractive agent *for the reaction of sulfur compounds to form ionic*

reaction products forming in the aqueous solution. As demonstrated in Keyworth, considered to be the closest prior art of record, the mechanism for reducing sulfur using sodium hypochlorite (an exemplary hypochlorite) typically involves oxidative desulfurization to form higher boiling compounds which are subsequently separated by fractionation and does not involve a reaction with the sulfur compounds to form ionic reaction products forming in the aqueous solution, *wherein sulfur content is reduced by removal of the aqueous solution of ionic reaction products.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schoonover (US 7,001,504).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RENEE ROBINSON whose telephone number is (571)270-7371. The examiner can normally be reached on Monday through Thursday 7:30-5:00.
